EXTERNSHIPS IN CLINICAL NEUROPSYCHOLOGY

The New York University (NYU) Comprehensive Epilepsy Center is recruiting clinical externs with an interest in neuropsychology for the 2009-10 training year. Selected externs will learn to administer, score, and interpret neuropsychological test batteries in adults undergoing in-patient work-ups for seizures and other neurological conditions. Externs will attend case conferences, teaching rounds, and various didactic experiences in the Departments of Neurology and Psychiatry at NYU Medical Center. There will be opportunities to observe the intracarotid amobarbital procedure (Wada Test) and intracranial brain-mapping of language in surgical candidates. There is also an option for gaining research experience in ongoing investigations and for developing individual projects to meet requirements for master's degree and doctoral dissertation research.

The externship will begin on September 1, 2009 and extend through the end of May, 2010. There are also opportunities for intensive summer experiences (beginning of June to the end of August) for interested applicants. Please specify in your cover letter which externship you are interested in (academic year or summer). Current enrollment as a doctoral student in Psychology is required. Graduate coursework in neuropsychology and prior testing experience is strongly preferred. The application deadline is February 1, 2009.

For questions please contact Dr. Morrison.

Interested applicants should send a cover letter, curriculum vita, and two recommendation letters to:

Chris Morrison, Ph.D., ABPP
Neuropsychology Externship Coordinator
NYU Comprehensive Epilepsy Center
223 E 34th Street
New York, NY 10016
E-mail: chris.morrison@nyumc.org

Additional questions can be addressed to:

William Barr, Ph.D., ABPP
