

Department of
Obstetrics and Gynecology

Gynecologic Oncology Fellowship

NYU Langone's Department of Obstetrics and Gynecology offers a three-year Gynecologic Oncology Fellowship with the mission of training fellows to be outstanding physician–scientists, as well as clinical gynecologic oncologists. Our fellowship is led by Whitfield B. Growdon, MD., fellowship director, is accredited by the ACGME. We accept one fellow per year.

Meet Our Current Fellows

Jude Nawlo, MD

First-Year Fellow, Class of 2026

Hometown: Lakeland, Florida

Medical school: University of South Florida Morsani College of Medicine

Residency: NYU Long Island School of Medicine

Hobbies: biking, musicals, science fiction, bookstore hopping, visiting cat cafes

Why I chose NYU Langone: The incredible faculty mentors and fellows, diversity of the clinical experience, and comprehensive scope of learning and practice.

Catherine Hermann, MD

Second-Year Fellow; Class of 2025

Hometown: All over! New York is my eighth state

Medical school: University of Arizona College of Medicine–Phoenix

Resident: Penn Medicine–Pennsylvania Hospital

Hobbies: hiking, reading, skiing, and eating my way through New York City

Why I chose NYU Langone: The Bellevue experience is truly unique among fellowships, and I couldn't ask for better faculty mentors and co-fellows.

Jharna Patel, MD

Second-Year Fellow, Class of 2025

Hometown: Iselin, NJ

Medical school: Rutgers Robert Wood Johnson Medical School

Residency: Rutgers Robert Wood Johnson University Hospital

Hobbies: reading, cooking, hiking, watching really bad TV

Why I chose NYU Langone: The outstanding support from the faculty and the patient experience at Bellevue Hospital.

Meet Our Current Fellows

Sarah Lee, MD, MBA

Third-Year Fellow, Class of 2024

Hometown: Seattle, Washington

Medical school: NYU School of Medicine

Residency: NYU School of Medicine

Hobbies: hiking, New York Times crossword puzzles, watching bad TV, and reading good books

Why I chose NYU Langone: The faculty mentors I hope to emulate and the patients at Bellevue.
