# THE VIOLET BALL

April 16, 2008

Since its founding in 1841, NYU Medical Center has fostered a level of excellence that has made it one of the foremost academic medical institutions in the nation. Today, as we face the increasingly complex health care challenges of the 21st Century, the Medical Center stands poised to take the lead in translating monumental discoveries such as cancer vaccines, stem cell therapy, and the human genome into groundbreaking patient-centered care that impacts every aspect of society.

The Violet Ball will honor Elaine and Ken Langone for their exemplary commitment and devotion to NYU Medical Center. Together we will celebrate the Medical Center's longstanding tradition of excellence in education, research, and patient care, and will also raise significant funds to address the institution's areas of greatest opportunity, advance its bold vision, and strengthen its role as a rich resource of and for the diverse communities of New York and beyond.
