Host Defense: Mechanisms and Therapeutics Module

Academic Year: **2006-2007**

Student Name (optional):

Please think about the module as a whole as you answer the following questions:

1. Was the module well organized?

2. Were the module objectives identified?

3. Were the module objectives achieved?

4. Were the lectures clearly presented?

5. Did the lectures help you understand the module material?

6. Were the assigned readings (textbooks, syllabus, reference, atlas, etc.) useful as resources?

7. Were the module handouts of high quality (content, clarity, well organized)?

8. Did the laboratory sessions help you learn the material?

9. Was the workload reasonable?

10. Were the exams/assessments a fair test of the material presented?

11. Was the ratio of factual to conceptual material on the exams reasonable?

12. Did the module encourage independent study?

13. Did the module encourage independent thinking (i.e. in your preparation for case studies)?

14. Did the module provide opportunities for active student participation?

15. Did the computer based exercises/assignments help you to understand the material?

16. Did the module integrate issues relevant to clinical medicine?

17. Did you receive sufficient and constructive feedback during this module?

18. Were faculty accessible?

19. Overall, was there a feeling of enthusiasm and enjoyment about learning in this module?

20. Did the Lab/Conferences require preparation?

21. Did the Lab/ Conferences promote active discovery or problem solving?

22. Did you actively participate in the Lab/Conferences?

23. Did the on-line pre-lab exercises heighten your learning in the lab?

24. Were the Lab/ Conferences helpful in understanding the module material?

25. Did the use of the Audience Response System enhance your learning in the CPC's?

26. What was the degree of integration among the disciplines?

27. Was there excessive or redundant coverage of any topic?

28. Were there any topics that require more thorough coverage in lectures or conferences or that should be added?

Overall Evaluation:

29. Were you satisfied with this module?

Considering all aspects of the Host Defense: Mechanisms and Therapeutics Module please provide comments and suggestions:

What were the module's **strong** points?

What were the module's **weak** points?
