

# Multicenter Chronic Pelvic Pain Registry

## **Purpose**

- Create a multicenter prospective database of women with chronic pelvic pain.

## **Goals**

- Improve the understanding of female pelvic pain disorders through hypothesis driven projects in
  - Epidemiology
  - Molecular biology
  - Genetics
  - Clinical science
- Provide a secure database of information available to researchers internationally.

## **Design**

- HIPAA compliant
- Internet accessible, Oracle 9i database
- Fully scalable

## **Cost to participate**

- Free!!! This database has been developed by the NYU School of Medicine, Department of Obstetrics and Gynecology for public access.

## **Who can participate?**

- Established pelvic pain center
- Research support
- Ability to collect clinical data and specimens.
- Approved IRB and data sharing agreement with NYU

## **Contact Information:**

- PI: Kenneth A. Levey MD MPH, NYU School of Medicine
  - 212 263 3144
  - [leveyk01@med.nyu.edu](mailto:leveyk01@med.nyu.edu)
- Research Administrator: Cornelia Davis
  - 212 263 5198
  - [cornelia.davis@med.nyu.edu](mailto:cornelia.davis@med.nyu.edu)

If you are interested in participating in this exciting research initiative, please email Dr. Levey. You will be given tourist level access to the database.
